

Internet Telephony PBX System (200 SIP User Registrations)

Intuitive, Ease-of-Use IP PBX Management

PLANET IPX-2200 advanced IP PBX telephony system is effortlessly set up and managed, thanks to its intuitive **web-based user interface** and **quick setup wizard**. As an **asterisk-based** solution, it offers the complete benefits of **pre-loaded SIP**, akin to features found in other high-end enterprise-level appliances. With a capacity to accommodate **200 user registrations**, the IPX-2200 simplifies the administration of a comprehensive voice-over-IP system, providing both convenience and cost advantages. The equipment is best paired with PLANET color IP phones to get the function going smoothly and to have a seamless connection between the software and hardware.

Replacing Old PBX Easily without New Wiring

Cost-effective, easy-to-install and simple-to-use, the IPX-2200 converts standard telephones into IP-based networks. It enables the service providers and enterprises to offer users traditional and enhanced telephony communication services via the existing broadband connection to the Internet or corporation network.

With the IPX-2200, SMBs are able to save the installation cost and extend their past investments in telephones, conferences and speakerphones. The IPX-2200 can be the bridge between the traditional analog system and IP network without having to invest heavily.

Distributed VoIP Network Infrastructure

In the new-generation communication age, the IPX-2200 supports IPv6 and VPN (client/server) connection to provide users with more flexible and advantageous communications products. With PLANET DDNS function, the IPX-2200 also helps users to apply and remember the login information easier. Its multiple-language feature helps user to quickly and friendly manage the system. Moreover, the IPX-2200 supports Lync server to which smart phone (using third-party app) and analog phone are connected via its communication with other devices of Lync server.

Applications

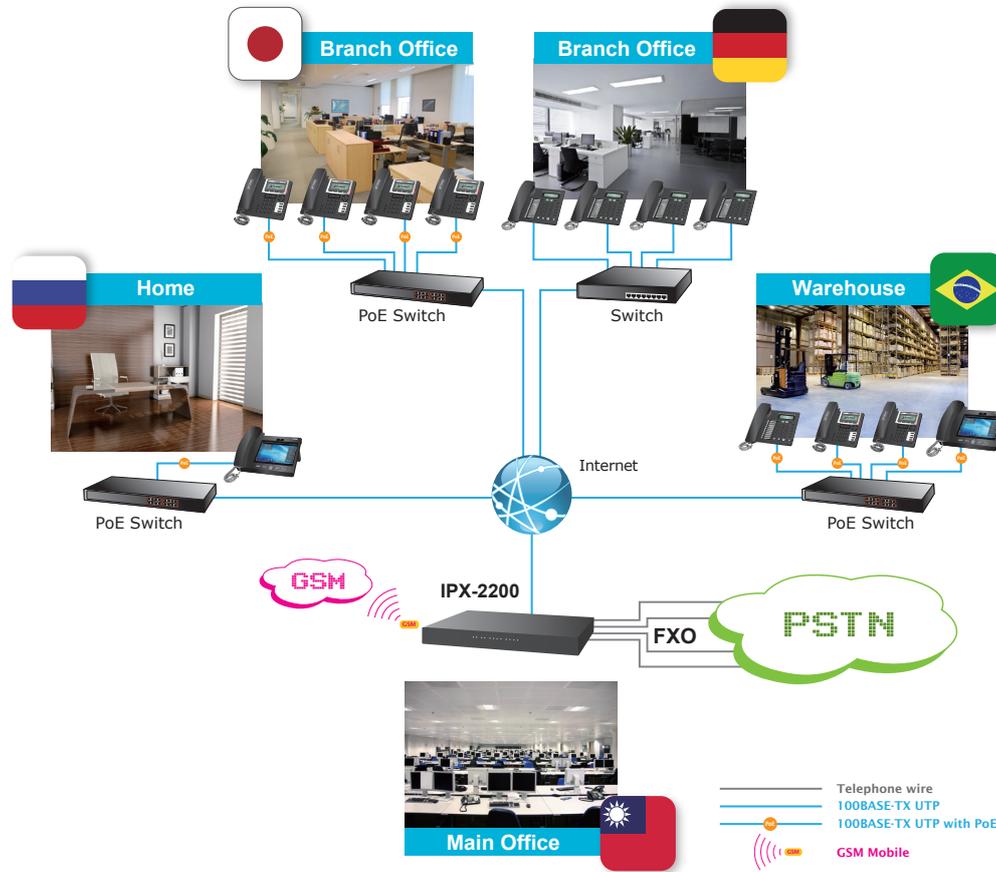

Full Security with VPN Support

The IPX-2200 guarantees robust security and cost-effective connectivity for geographically dispersed offices within an organization, establishing a unified virtual network. This advanced VPN technology is not only ideal for connecting corporate branches but also empowering individual internet users seeking identity protection through proxy servers. With both VPN server and client functions, the IPX-2200 provides users with secure login capabilities, ensuring full security.

Supports VPN Client and VPN Server

The IPX-2200 provides the essential features you need for business-class voice communications in an easy-to-manage solution. Designed for medium-sized businesses with branch offices, the IPX-2200 voice, conferencing, mobility, voice gateway, and IP PBX services are created on a single appliance.
